## MASTerview MAP

The screenshot displays the MASTerview MAP interface. On the left is a login screen with fields for 'Nom d'utilisateur' (Patrick MAYNE) and 'Mot de passe', along with 'Connexion' and 'Retour' buttons. The main area shows the 'CODINE TESTING UNIT' monitoring dashboard. It includes a 'Climaspot MYP' section with a line graph for temperature and humidity over time. Below the graph are tabs for 'Information', 'Control', 'Alarmes', 'Mesures', and 'Notes'. The 'Alarmes' tab is active, showing a list of alarm types: 'Câble', 'Sans fil', and 'Climaspot MYP - Alarme Temperature | OK Temperature' (with a green status indicator), and 'Climaspot MYP - Alarme Humidite | OK Humidite' (with a red status indicator). A 'Journal des alarmes' section on the right shows a log for '2024-03-15' with two entries: 'CLIMASPOT MYP/BATT.LOW' and 'CLIMASPOT MYP ALARM HUM 59,5'.
